Subject: Coal is killing

[Local physicians say asthma case loads seem high](#)

Please read the above article. I have NO clue why this seems to be ignored??? From the EPA to the State Government to the Local Government. This is a big big problem. People who say you care, Stand up NOW for my family and families like mine. There are suppose to be Agencies to protect us from this. Thus far, in the last ten years, WEC has gone unchecked... MY PATIENCE IS GONE!!
